Control to fit your amplification

Thermal Cycler Fleet Control Software

Manage multiple users, methods, and instruments with a single intuitive interface
Applied Biosystems™ Thermal Cycler Fleet Control Software is as intuitive and easy to use as our thermal cyclers. With this tool, you'll be able to view and control all Applied Biosystems™ thermal cyclers.

Secure—Thermal Cycler Fleet Control Software comes preinstalled on a server that sits securely behind your firewall

Flexible—create custom permissions and rules for users, methods, and instruments

Powerful—quickly view your thermal cycler inventory and availability right from the dashboard

Convenient—control your thermal cyclers, reports, methods, and firmware upgrades from your office, another lab computer, or any other networked device

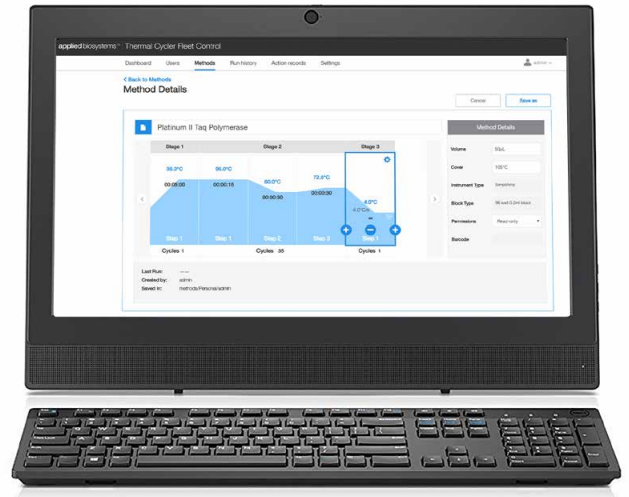

Enjoy peace of mind knowing that Thermal Cycler Fleet Control Software operates completely inside of your organization's firewall.
