

5 Benefits to Using AutoCONFIG Software in Flow Measurement and Control

1

Control
15+ functions from single valve control to station control.

2

Configurability
Customizable and pre-designed screens, copy/paste configurations and categories create a user-friendly experience that saves time and simplifies the dashboard.

Categories:

- I/O
- Calculations
- Communications

3

Convenience
Easily operates on latest platforms.

4

Offline access
Gain access to data and modify configurations without a physical instrument present.

5

Standardization
A single program for all active instruments.
