

Extend your budget

# SureSTART collection

## The power to extend your consumables budget

Vial and cap products are an essential part of every chromatographic workflow—from sample storage and containment to analysis—and the products you choose can have an impact on the performance, reproducibility and accuracy of your results, as well as your profit margins.

### For best results, start your analysis off right.

The best analysis starts with the right workflow products. Using our new Thermo Scientific™ SureSTART™ vials and caps, your valuable samples have the sample security and integrity they need to deliver excellent results.

Available in three different performance levels, you will find it easy to select products best suited to your analytical, performance or value needs. What's more, you'll have full confidence that every SureSTART product meets specification—ensuring there's no weak link in your workflow.

### Streamlined performance. Trusted quality.

For analytical chemists who perform chromatographic analysis, The SureSTART collection of vials and caps provide a wide selection of products that are compatible with all your lab instruments, and provide sample security to ensure you can consistently deliver accurate and reproducible results right from the start of your sample journey.

## The more you buy the more you save

If you are working within a budget, our SureSTART collection offers several ways to realize extra value and extend your funds.

### Option 1: Pack sizes

If you need products that meet your required performance, you'll love our bulk purchase options on our vials and caps.

For your convenience, you can purchase SureSTART vials and caps separately in 100 packs, 10 × 100 packs and 50 × 100 packs, each with their own part numbers, to make your budget go further. With bulk discounts built-in, the more you buy, the more you save.

### Option 2: Performance levels

If your budget fluctuates, you've got choices. You can try products from our different performance levels to see if they meet your lab goals.

**Performance level 1**  
Everyday analysis:  
Chromatography approved

**Performance level 2**  
High throughput:  
Robust and reproducible

**Performance level 3**  
High performance:  
Selective and sensitive

Learn more about our performance levels and what is recommended for GC and LC detectors and MS technologies

### Easy ways to purchase SureSTART products

- eCommerce: [thermofisher.com/surestart](https://thermofisher.com/surestart)—once you have selected the right products, be sure to add them to your favorites list for simpler ordering next time.
- Your local Thermo Fisher Scientific sales representative or preferred distributor.
