

ICS-5000⁺ Discontinuance Notification

October 2018

Dear Thermo Fisher Scientific Customer,

The Thermo Scientific Dionex ICS-5000⁺ is a module based Ion Chromatography System which incorporates a range of pump capabilities and options of conductivity, electrochemical or UV/Visible detection modes. With the introduction the new ICS-6000 earlier in 2018, the ICS-5000⁺ is being discontinued as of Dec. 31st 2018.

The ICS-6000 is the direct replacement for previous generations of the modular high-end HPIC systems, allowing easy transfer of all applications from the ICS-3000, ICS-5000, and ICS-5000⁺ systems.

ICS-5000⁺ systems will be fully supported with consumables and spare parts, Chromeleon software, and service repairs until December 2025.

Thermo Fisher Scientific continues to offer a wide selection of ion chromatography instruments to meet a broad range of laboratory requirements. If you need additional information on the ICS-5000⁺ discontinuance, please contact your local support representative.

If you would like a quote or would like to receive additional information on the ICS-6000 or any other Thermo Scientific products, call your local sales representative. Please also visit our website <http://www.thermofisher.com>
