Traceability and data security

Introducing the SAE Administrator Console v2.0 for the SeqStudio Genetic Analyzer

The new security, audit, and electronic signature (SAE) module* is an optional component of Applied Biosystems™ SeqStudio™ Data Collection Software that offers an electronic data chain of custody to:

• Help ensure integrity of your data

• Manage system security and quality control

All settings in the SAE module are customizable to fit your laboratory requirements.

Get secure
The SAE module enablement requires an on-site field service engineer (FSE) and a PC (desktop or laptop) purchased from Thermo Fisher Scientific. Contact your sales representative to discuss how you can start ensuring the integrity of your data today.

System security
• Define security settings for each account

• Authenticate login details for users

• Set inactivity duration time for automatic screen locking

Auditing
• Incorporate comprehensive auditing of data objects

• Record event logs for unauthorized attempts

• Detect changes to data

Electronic signature
• Require authentication for changes

* Compatible with the Applied Biosystems™ QuantStudio™ 7 Pro and QuantStudio™ 5 Real-Time PCR Systems.
