

VeriFiler Plus and VeriFiler Express PCR Amplification Kits

Cat. Nos. A35495 and A32014

Thermo Fisher Scientific performed developmental validation experiments in accordance with the DNA Advisory Board (DAB) Quality Assurance Standards (September 1, 2011) and guidelines from the Scientific Working Group on DNA Analysis Methods (SWGDM, December 2016) to evaluate the performance of the Applied Biosystems™ VeriFiler™ Plus and VeriFiler™ Express PCR Amplification Kits. Thermo Fisher Scientific has validated the kits for use in human identification testing.

Each laboratory using the VeriFiler Plus or VeriFiler Express PCR Amplification Kits should perform its own appropriate internal validation studies to establish interpretation criteria and demonstrate that the VeriFiler PCR Amplification Kits are appropriate and fit for its own human identification uses.
