AVIAN1F:
avian and poultry-specific formulary

BOP06F:
bovine and porcine-specific formulary containing FDA-approved food animal compounds

BOP07F:
bovine and porcine-specific formulary containing FDA-approved food animal compounds, including gamithromycin and tildipirosin

CAMPY*:
Campylobacter spp.-specific formulary

CMV1AMAF:
mastitis-specific formulary containing FDA-approved food animal compounds

CMV4AGNF:
NARMS surveillance Gram negative isolate formulary

CMV3AGPF:
NARMS surveillance Gram positive isolate formulary

CMV1BURF:
dual isolate urinary isolate-specific formulary

COMPGP1F:
companion animal-specific antimicrobics for Gram positive isolates

COMPGN1F:
companion animal-specific antimicrobics for Gram negative isolates

EQUIN1F:
equine-specific formulary

EUCAMP2[†]:
EU surveillance, two isolate *Campylobacter* spp.-specific format

EUST[†]:
EU surveillance Staphylococci-specific format

EUVENC[†]:
EU surveillance *Enterococcus* spp.-specific format

EUVSEC[†]:
EU surveillance Salmonella and *E. coli*-specific format

EUVSEC2[†]:
EU surveillance ESBL-specific format

JO-EYE2:

two isolate, 96-well

microtitre plate for

breakpoint testing of

topical compounds

*Requires visual interpretation. †Not available in the U.S. For veterinary use only.
